Datasets and Sources: Hindi Voice Health Triage Assistant

Direct links for every dataset and source the project needs, grouped by purpose.

Common Voice and IndicVoices both need you to log in and accept terms on Hugging Face before downloading.

1. Speech (Hindi ASR training and testing)

Dataset	Link	Notes
Mozilla Common Voice (Hindi)	https://commonvoice.mozilla.org/hi/datasets	Official page. The Hugging Face copy at https://huggingface.co/datasets/mozilla-foundation/common_voice_17_0 loads with the "hi" language config. Accept the terms first.
IndicVoices (AI4Bharat)	https://huggingface.co/datasets/ai4bharat/IndicVoices	Gated: you must agree to share contact information. Released under CC BY 4.0. Includes spontaneous, conversational speech, which is closer to real villagers than read speech.
Vistaar (benchmark and training sets)	https://github.com/AI4Bharat/vistaar	Datasets, code and models are open-sourced, including the IndicWhisper models.
Lahaja (Hindi accent benchmark)	https://github.com/AI4Bharat/Lahaja	12.5 hours of Hindi audio covering different accents.
Ready-packaged Hindi test set	https://huggingface.co/datasets/RinggAI/ASR-Benchmarking-Dataset	10,000 utterances, about 15.5 hours, built from Vistaar parts such as FLEURS, Kathbath and CommonVoice. A quick way to compute WER without downloading everything.

2. Knowledge base for RAG (the core of the system)

Source	Link	Notes
WHO IMCI chart booklet (2014)	https://www.who.int/publications/m/item/integrated-management-of-childhood-illness---chart-booklet-(march-2014)	80-page WHO technical document. Main source for child danger signs.
WHO sick young infant update (2019)	https://www.who.int/publications/i/item/9789241516365	Supersedes the sick young infant section of the 2014 booklet.

Source	Link	Notes
WHO community health worker chart booklet	https://www.childhealthtaskforce.org/sites/default/files/2019-06/Caring%20for%20Sick%20Child%20in%20the%20Community%20CHW%20Chart%20Booklet%28WHO%2CUNICEF%2C2014%29.pdf	Simple "danger sign, refer urgently" flow that maps well onto the rule engine.
ASHA modules portal (NIOS)	https://asha.nios.ac.in/	Official portal listing ASHA manuals and books, including Modules 6 and 7.
ASHA Module 6 (PDF)	https://hbnc-hbyc.mohfw.gov.in/assets/document/ASHA_Training_Module_6.pdf	Direct PDF.
State NHM IEC material	https://nhm.hp.gov.in/cp/iec-material	State NHM pages such as this one also host Hindi ASHA handbooks.

3. Evaluation datasets

Dataset	Link	Notes
MedQuAD	https://github.com/abachaa/MedQuAD	47,457 medical question-answer pairs from 12 NIH websites.
MedQuAD (Hugging Face)	https://huggingface.co/datasets/lavita/MedQuAD	The lavita version removes answers from some sources to respect MedlinePlus copyright. Use the GitHub original if you need the full set.

Dataset	Link	Notes
MedMCQA	https://huggingface.co/datasets/openlifescienceai/medmcqa	Over 194k AIIMS and NEET PG exam questions across 21 medical subjects. Apache 2.0 licence.
MedQA	https://huggingface.co/datasets/openlifescienceai/medqa	Extra clinical-vignette style questions.

4. Translation (Hindi to English for English-only components)

Model	Link	Notes
IndicTrans2	https://github.com/AI4Bharat/IndicTrans2	Supports all 22 scheduled Indian languages.
IndicTrans2 Indic to English (1B)	https://huggingface.co/ai4bharat/indictrans2-indic-en-1B	Hindi to English model.

5. What you must build yourself (no public dataset exists)

- **The 100 triage test cases:** write them from the IMCI and ASHA danger-sign lists above, tagged Emergency, See a doctor today, See a doctor this week or Home care. Have a medical student review them.
- **Health-specific Hindi audio:** record 50 to 100 short phrases yourself (such as "bachche ko tez bukhar hai") on a phone, with family members and some background noise. Public corpora don't cover health vocabulary well.
- **Red-flag keyword lists in Hindi and Hinglish:** write these by hand and test them on your recordings.

6. Not verified

Direct download links for the following could not be confirmed:

- **ICMR guidelines:** search the ICMR site for "treatment guidelines" and check each document's licence.
- **Bhashini APIs:** you need to register for API access.

- **A Hindi TTS dataset:** no verified source found.

7. How each source plugs into the pipeline

Pipeline step	Data used
Speech to text	Common Voice, IndicVoices, Vistaar, Lahaja for WER testing; your own health-phrase recordings
Red-flag rules	IMCI and ASHA danger-sign lists; your Hindi and Hinglish keyword lists
Retrieval (RAG)	WHO IMCI booklets, ASHA modules, state NHM handbooks
Answer evaluation	MedQuAD, MedMCQA, MedQA, plus your 100 triage test cases
Translation	IndicTrans2
